PAUL GERARD

Drone · Photogrammetry · Geospatial data

Contact details to be completed

A certified drone pilot and geomatics technician in training, I fly drones and turn what they capture into reliable data: orthophotos, 3D models and ready-to-use GIS layers.

> **Looking for:** I'm looking for a host company for a work-study programme as a Geomatics Project Manager (IDGEO), in the Marseille area, ideally one that uses drones to acquire its data.

EXPERIENCE

Intern — historical orthophoto production Sep–Oct 2026 · 2 months
IGN (French mapping agency) · DISCO unit
- Orthophoto mosaics from historical aerial photographs
- Image processing, quality control, georeferenced data
- Inside the production chain of a national reference agency

Drone coordinator Summer 2024
Paris 2024 Olympic and Paralympic Games

Intern 2024
DroneBox · Montréal, Canada

Drone pilot dates to be completed
DroneBox
- Helped set up a remote-pilot training centre

Technical sales advisor 2023–2025
Company to be specified · Marseille
- Advising customers on technical products

EDUCATION AND CERTIFICATIONS

Professional title, Geomatics Technician — RNCP37103 since April 2026
IDGEO, Colomiers · remote (MTFAD)
- Collect: IGN, INSEE, Corine Land Cover, WMS/WFS/WMTS, land-use plan digitising
- Integrate: PostgreSQL/PostGIS, MERISE, topology checks, INSPIRE metadata
- Deliver: thematic maps, QGIS and ArcGIS Pro, atlases, Lizmap

Certification: drone piloting and UAS operator management 2025
Minute Drone, Marseille
- Missions, airspace, operations manual, declarations, fleet management

STS-01 / STS-02 practical certificate 2025
Minute Drone, Marseille

CATS — standard scenarios theory certificate 2025
DGAC

BAPD — remote pilot licence (A1/A2/A3) 2024
DGAC

First year, BA History, Art History and Archaeology 2023
Aix-Marseille Université

French baccalauréat — HGGSP, LLCER 2022
Lycée Montgrand, Marseille

STRENGTHS

From flight to data
I plan the mission, fly, then process: photogrammetry, quality control, GIS integration.

Regulatory rigour
Airspace analysis, operations manual, declarations: I know the framework and work within it.

Heritage perspective
My art history background shapes my project: 3D digitisation of built and archaeological heritage.

FIELDS

Drone & acquisition
Mission planning, flight and image capture.

Photogrammetry & 3D
Orthophotos, point clouds, meshes, Gaussian splatting.

GIS & geospatial data
Databases, spatial analysis, Python scripts, mapping.

Cesium & visualisation
Web 3D delivery: Cesium, iTowns, Three.js.

HIGHLIGHTS

- RNCP37103 Geomatics Technician title (IDGEO)
- CATS + STS-01 / STS-02
- IGN internship, DISCO unit
- Drone coordination, Paris 2024 Olympics
